

TURN EVERY MAGAZINE  
**RACK  
BUDDY**  
INTO A TRAINING MAGAZINE

**Instructions:**

Rack Buddies have a number embossed on the left side indicating the caliber.

---

Load your magazine to capacity, minus 2 rounds.

Insert a tool such as small screwdriver or allen wrench into the hole.

Load the Rack Buddy the same way you would load a round into the magazine.

Setup as many magazines as you need to allow your most effective practice routine.

**At least four are recommended.**

When ready to unload, use the same tool to remove them by pushing the back down, while pulling up on the front.

---
